

**Team:** Nuha Albadi  
Mukund Madhusudan Atre  
Karthik Handady

**Title:** Library Checkout System

1. List the features that were implemented (table with ID and title).
2. List the features were not implemented from Part 2 (table with ID and title).
3. Show your Part 2 class diagram and your final class diagram. What changed? Why? If it did not change much, then discuss how doing the design up front helped in the development.
4. Did you make use of any design patterns in the implementation of your final prototype? If so, how? Show the classes from your class diagram that implement each design pattern (each design pattern as a separate image in the .PDF). If not, where could you make use of design patterns in your system? Show a class diagram of how you could implement each design pattern and compare how it would change from your current class diagram.
5. What have you learned about the process of analysis and design now that you have stepped through the process to create, design and implement a system?
